NOVARTIS

Welcome

Dear Professors, colleagues and Young Ophthalmologists ,

On behalf of the Department of Ophthalmology, Ain- Shams University, it is our great pleasure to welcome all of you to our Annual Scientific meeting that will be held at the JW Marriott , New Cairo on 30 November 2017.

Our department over long years had generated pioneers in many ocular disciplines and we are committed to our mission of continuous educational and scientific activities.

This meeting is a new spark to reignite and re-emphasize the leading role of Ain-shams University, Department of Ophthalmology as a leader institute in education and research.

We are proud to present a program prepared by our distinguished faculty and we are proud to host distinguished faculty guest speakers from other Universities and hospitals to build bridges with sister institutes.

The theme of the meeting is "Challenges in pediatric Ocular disease" which is a formidable area which needs skill and patience to overcome obstacles and frustrations to achieve ultimate success. We will go in depth across all subspecialties from pole to pole and go around the globe to discuss challenges in strabismus and adnexa as well. This will be followed the next day by hands on instruction courses that will be held at Demerdash and Ain-Shams Specialized Teaching hospitals in parallel.

We hope that you will enjoy the meeting and learn a new piece of information that may impact your daily practice. We are looking forwards for a meeting full of genuine science and, and sincere friendship.

President of Meeting

Fikry Zaher

SPEAKERS INSTRUCTIONS..

Congress halls will be equipped with:

Two laptops: one Apple Mac & one PC with Microsoft Windows 8 and Microsoft Office 2013.
Internet access will NOT be available inside the meeting rooms.

To ensure that the meeting progresses smoothly, please stick to the following instructions:

- All presentations should be recorded on a USB flash memory (preferred).
- Please save presentations in PowerPoint 2007 or later format for PC & Keynote for Apple.
- Upload your presentation early to the Audiovisual Center (RM Events) as we will load the presentations to the hard drive of our systems before the sessions by one hour.
- No personal laptops are permitted for presentations.
- In case you have problems with your presentation(s), please do not hesitate to contact the IT support team (RM Events).

Computerized Count-Down TIMER will monitor speakers' time

So make sure to present during the given time,
as **NO EXTRA TIME IS ALLOWED**

12:55  → 00:55

Thursday 30th November, 2017

Scientific Day

JW Marriott Hotel

08:00 - 08:50

REGISTRATION AND BREAKFAST

08:50 - 09:00

OPENING REMARKS

Head of department and meeting director

09:00 - 11:20

SESSION 1: CHALLENGES IN PEDIATRIC ANTERIOR SEGMENT DISEASES:

A. Challenges in Pediatric Cornea: High risk Task !

Chairpersons: : Tamer El Raggal, Moemen M. Seleet

09:00 Pediatric pentacam
Maged Maher (Ain Shams University)

09:08 Pediatric PKP
Tamer El Raggal (Ain Shams University)

09:16 My first encounter with Pediatric PKP: Joys and Mistakes
Moemen M. Seleet (Ain Shams University)

09:24 Refractive surgery in children! A child should not have to fail.. to see?
Basem Fayed (Ain Shams University)

09:32 Discussion

B. Challenges in Pediatric Cataract: Tricky and Sticky!

Chairpersons: : Ahmed Assaf, Hala El Hilali, Mohamed Gameel

09:40 Challenges in IOL power calculation in pediatric cataract
Sheriene Shafik (Ain Shams University)

09:48 Pediatric cataract surgery with bicapsular optic capture "sealed bag technique"
Mohamed Gameel (Ain Shams University)

09:56 Management of Aphakia and subluxated lens
Ahmed Assaf (Ain Shams University)

10:04 **Key note Guest lecture:** Challenges in pediatric cataract surgery
Hala El Hilali (Cairo University)

10:14 Discussion

C. Challenges in Pediatric Glaucoma: working Under Pressure !

Chairpersons: Fikry Zaher, Moemen Hamdy, Ahmed Yousry El Karmooty

- 10:22 Goniotomy: What is new about an old technique
Maged Maher (Ain Shams University)
- 10:30 Trabeculotomy: Are we doing it right
Yasmine El Sayed (Cairo University)
- 10:38 Challenges in Sturge Weber Syndrome
Thanaa Helmy (Ain Shams University)
- 10:46 Challenging pediatric glaucoma case
Moemen Hamdy (Ain Shams University)
- 10:54 **Key note Guest lecture:** Challenges of putting a shunt in congenital glaucoma
Ahmed Yousry El Karmooty (Moorefields Eye Hospital)
- 11:04 Discussion

Thursday 30th November, 2017

Scientific Day

JW Marriott Hotel

11:20 - 13:20

**SESSION 2: CHALLENGES IN PEDIATRIC RETINA:
THE ULTIMATE CHALLENGE!**

A. Challenges in Pediatric Retina:

Chairpersons: Sherif Embabi, Mohamed Moghazy, Mohamed Zaki

- 11:20 Challenges in imaging and screening ROP in Egypt
Mariam El Fikky (Ain Shams University)
- 11:28 Infant macula: how does OCT explains Vision in little ones!
Yousra Farweez (Ain Shams University)
- 11:36 Choroidal Neovascularization in Pediatric age group: How different?
Rabab Emar (Ain Shams University)
- 11:44 Pediatric Diabetic Retinopathy: How much do we know?
Tamer Fahmy Elewa (Ain Shams University)
- 11:52 Uveitis in kids: systemic treatment beyond steroids
Dina Baddar (Research Institute of Ophthalmology)
- 12:00 The Cambridge prophylactic Cryotherapy Protocol in type 1 Stickler Syndrome
Ahmed Abdel Aleem (Ain Shams University)
- 12:08 Pediatric retinal detachments complicating Colobomas and Retinoschisis
Mohamed Moghazy (Ain Shams University)
- 12:16 Trauma Scores in kids: How different than adults?
Esraa Diab (Ain Shams University)
- 12:24 PVR Vs Surgeon in pediatric open globe injuries: a heavy weight fight that needs multiple rounds!
Sherif Embabi (Ain Shams University)
- 12:32 Discussion

B. Anti VEGF Agents use in Pediatric Retinal disease: Which , When and How?

Chairpersons: Alaa Fathy, Tarek Mamoun

12:40 Bevacizumab in ROP: Critique of BEAT-ROP study
Ahmed Habib (Ain Shams University)

12:46 Ranibzumab in ROP
Mohamed Hanafy (Ain Shams University)

12:52 Aflibercept in ROP
Abdel Rahman Gaber (Ain Shams University)

12:58 Role of Anti VEGF agents in other pediatric retinal vascular disorders
Nour Eldin Hussein (Ain Shams University)

13:04 Neurodevelopment and use of anti-VEGF agents in premature infants
Mariam El Fikky (Ain Shams University)

13:10 Discussion

13:20 - 13:50

COFFEE BREAK AND EXHIBITION

Thursday 30th November, 2017

Scientific Day

JW Marriott Hotel

13:50 - 16:06

SESSION 3: CHALLENGES IN PEDIATRIC STRABISMUS, NEUROPTHALMOLOGY, ONCOLOGY AND OCULOPLASTY

A. Challenges in Pediatric strabismus and Neuro-ophthalmology : A child with a lot of nerve!

Chairpersons: Hazem Nooh, Mohamed Rashad

13:50 Synergistic Divergence: do we really know ?
Ahmad Taha (Ain Shams University)

13:58 New Trends in Resistant Strabismus
Mohamed Rashad (Ain Shams University)

14:06 Stuck outside the eye: is it troublesome ?
Waleed El Zawahry (Ain Shams University)

14:14 Challenging Paralytic strabismus cases
Hazem Nooh (Ain Shams University)

14:22 Challenges in Pediatric Neuro-ophthalmology : tips and tricks
Noha Mohsen (Ain Shams University)

14:30 Discussion

B. Challenges in Pediatric Ocular Oncology: Saving a new life !

Chairpersons: Osman Ziko, Adel Alei Eldin, Azza Said

14:38 Retinoblastoma with vitreous seeding
Osman Ziko (Ain Shams University)

14:46 Ocular manifestations of systemic tumors in children
Azza Said (Ain Shams University)

14:54 Xeroderma Pigmentosa
Hisham Khairy (Ain Shams University)

15:02 **Keynote Guest lecture:** Challenging Leukocoria
Adel Alei Eldin (Research Institute of Ophthalmology)

15:12 Discussion

C. Challenges in Pediatric Oculoplasty and Orbital diseases: Thinking outside the Globe !

Chairpersons: Sherif Elwan, Ahmed Shafik, Hatem Ayman

- 15:20 Blepharo-phimosis Syndrome
Sherif Elwan (Ain Shams University)
- 15:28 Congenital lid colobomas
Hatem Ayman (Ain Shams University Alumni)
- 15:36 New sling in Ptosis
Ahmed Shafik (Ain Shams University)
- 15:40 Medical Management of Orbital lymphangioma
Ahmed Shafik (Ain Shams University)
- 15:44 Orbital lymphangioma : surgical management
Mahmoud El-Samkary (Ain Shams University)
- 15:52 Endoscopic DCR in children
Ashraf Abdel Salam (Ain Shams University)
- 16:00 Discussion

Thursday 30th November, 2017

Scientific Day

JW Marriott Hotel

16:08 - 17:16

SESSION 4 : OUR YEARLY DEPARTMENT HARVEST

16:08 - 16:14

A. Ceremony to honor our retired professors:

Chairpersons: Fikry Zaher

Professor Osman Ziko.

B. Ain Shams Research Harvest 2016-2017: Master Thesis Award

Chairpersons: Fikry Zaher, Sherif Zaki

Jury: Khalid El Tagory, Hany El Ebiary, Rafik El Ghazawy, Amr Saleh

16:14 Comparison between surgical outcomes of tarsal marginal rotation and bi-lamellar tarsal rotation of upper eyelid cicatricial entropion
Reem Mohsen

16:17 The Value of Femtosecond assisted intrastromal astigmatic Keratotomy in correction of astigmatism during FLACS
Mostafa Emad

16:20 Comparative study between stab incision glaucoma surgery and sub-scleral trabeculectomy in management of POAG
Mohamed Awad

16:23 Assessment of ICL efficacy and short term complications in treatment of simple and compound myopic astigmatism
Abdel Rahman Shams

16:26 Comparison between the effectiveness of topical cyclosporine 0.05% and artificial tears eye drops in treatment of moderate dry eye
Ahmed Yehia

16:29 Anatomical and functional changes of the macula after vitrectomy for Tractional Diabetic Macular Edema
Mohamed Nasr

16:32 Study of protective effect of ocular viscoelastic devices on corneal endothelium in phacoemulsification
Ayman Swar

16:35 The incidence of ocular complications during and after Femtosecond LASIK surgery for treatment of refractive errors
Khalid Albadany

16:38 Verdict: Best Thesis presentation Award

C. International Publications:

Chairpersons: Sherif Elwan, Amany El Shazly

- 16:40 Peripheral avascular retina with disk anomaly and high myopia: A novel association in a hereditary isolated ocular disorder: *Retina*
Ahmed Habib, Rania Serag, Mohamed Saleh, Mohamed Abdel Salam
- 16:43 Correlation between subfoveal choroidal thickness and foveal thickness in thalassemic patients: *Retina*
Amany El Shazly, Rania Serag, Weam Ebeid, Marwa Deghedy
- 16:46 Safety of intracamer al injection of minimal bactericidal concentration of povidone iodine on the corneal endothelium in a rabbit model: *Cornea*
Rania Serag, Weam Ebaid
- 16:49 Rotating Scheimpflug imaging indices in different grades of keratoconus. *J of ophthalmology*
Sherine Shafik, Maged Maher
- 16:52 Outer Retinal layer thickness as good visual predictor in patients with diabetic macular edema *Retina Journal*
Tamer Fahmy Elewa, Mahdi A. Hussein, Mohamed Zaki, Osama A. Raslan
- 16:55 Quality of Vision after Deep Anterior Lamellar Keratoplasty (Fluid Dissection) Compared to Penetrating Keratoplasty for the Treatment of Keratoconus. *J of Ophthalmology.*
Islam Hamdy, Moemen Hamdy
- 16:58 Effect of Mitomycin C on Myopic versus Astigmatic Photorefractive Keratectomy. *Journal of Ophthalmology*
Ashwag El Mosa, Samah Fawzy
- 17:01 Efficacy of Intravitreal injection of 2-Methoxyestradiol in regression of neovascularization of a retinopathy of prematurity rat model. *BMC Ophthalmology*
Azza Said, Rania Gamal , Rania Salah Eldin, Maha Nasr, Samar Azab, Yasser El Zankalony
- 17:04 Clinical significance of high levels of surviving and TGF beta-1 proteins in aqueous humor and serum of retinoblastoma patients:
J of American Association for Pediatric ophthalmology and strabismus
Hana Shehata, Azza Abu Ghalia, Eman Elsayed, Azza Said, Safaa Mahmoud
- 17:07 Effect of smoking on macular function and structure in active smokers versus passive smokers. *Retina*
Amany El Shazly, Yousra Farwez, Yasser El Zankalony, Lamia Elewa, Botheina Farweez

Thursday 30th November, 2017

17:10 - 17:15

CLOSURE NOTES

Head of department and meeting director

17:15

DINNER

LITTLE EYES..
Big CHALLENGES

Dorzolamol

Dorzolamide 2% / Timolol 0.5%

LONG LASTING EFFICACY IN IOP CONTROL

Provides 50% reduction for IOP>30 mmHg

Consistent & maintained IOP - lowering effect.

Effective add-on therapy to Latanoprost.

High safety profile.

Favorable tolerability.

DOSAGE:

Instill one drop in the affected eye(s) twice daily⁸.

COMPOSITION: Each 1.00 ml contains: Dorzolamide hydrochloride 22.26 mg (equivalent to 20 mg Dorzolamide) Timolol maleate 6.83 mg (equivalent to 5 mg Timolol) **THERAPEUTIC CLASS:** DORZOLAMOL ophthalmic solution (dorzolamide hydrochloride and timolol maleate), is the first combination of a topical carbonic anhydrase inhibitor and a topical beta-adrenergic receptor blocking agent. **INDICATIONS:** DORZOLAMOL is indicated in the treatment of elevated intraocular pressure (IOP) in patients with open-angle glaucoma, pseudoexfoliative glaucoma or ocular hypertension when topical beta-blocker monotherapy is not sufficient. **DOSAGE & ADMINISTRATION:** - The dose is one drop of DORZOLAMOL in affected eye(s) two times daily. - When substituting DORZOLAMOL for another ophthalmic antiglaucoma agent(s), discontinue the other agent(s) after proper dosing on one day, and start DORZOLAMOL on the next day-if another topical ophthalmic agent is being used. DORZOLAMOL and the other agent should be administered at least ten minutes apart. **CONTRAINDICATIONS:** DORZOLAMOL is contraindicated in patients with: -Bronchial asthma or a history of bronchial asthma, or severe chronic obstructive pulmonary disease. -Sinus bradycardia, second or third degree atrioventricular block, overt cardiac failure, cardiogenic shock. -Hypersensitivity to any component of this product. The above are based on the components and are not unique to the combination. **WARNINGS & PRECAUTIONS:** Cardiovascular/Respiratory Reactions: -As with other topically-applied ophthalmic agents, this drug may be absorbed systemically. -The timolol component is a beta-blocker. Therefore, the same types of adverse reactions found with systemic administration of beta-blockers may occur with topical administration, including worsening of Prinzmetal's angina, worsening of severe peripheral and central circulatory disorders and hypotension. -Because of the timolol maleate component, cardiac failure should be ad- watched for and pulse rates should be checked. -Respiratory reactions and equatly controlled before beginning therapy with DORZOLAMOL. In patients with a history of severe cardiac disease, signs of cardiac failure should be cardiac reactions, including death due to bron- chospasm in patients with asthma and rarely death in association with cardiac failure, have been reported following administration of timolol maleate. Hepatic Impairment : - DORZOLA- MOL has not been studied in patients with hepatic impairment and should therefore be used with caution in such sulphonamides. Therefore, the same types w. Immunology and Hypersensitivity: - As with other topically-applied ophthal- u is drug may be absorbed systemically. mic agents, this disystemic administration of sulfonamides may occur with topical administra- tion, including severe reactions such as Stevens-Johnson syndrome and toxic epidermal necrolysis. If signs of serious reactions or hypersensitivity occur, discontinue use of this preparation. -Local ocular adverse effects, similar to those observed with dorzolamide hydrochloride eye drops, have been seen with DORZOLAMOL. If such reactions occur, discontinuation of DORZOLAMOL should be considered. -While taking (5-blockers, patients with a history of atopy or a history of severe anaphylactic reaction to a variety of allergens may be more reactive to accidental, diagnostic, or therapeutic repeated challenge with such allergens. Such patients may be unresponsive to the usual doses of epinephrine used to treat anaphylactic reactions. Concomitant Therapy: The following concomitant medication is not recommended: - Dorzolamioe and oral carbonic anhydrase inhibitors. -Topical beta-adrenergic blocking agents. Withdrawal of Therapy: - As with systemic beta-blockers, if discontinuation of ophthalmic timolol is needed in patients with coronary heart disease, therapy should be withdrawn gradually. Additional Effects of Beta-Blockade: • Therapy with beta-blockers may mask certain symptoms of hypoglycaemia in patients with diabetes mellitus or hypoglycaemia. -Therapy with beta-blockers may mask certain symptoms of hyperthyroidism. Abrupt withdrawal of beta-blockers therapy may precipitate a worsening of symptoms. -Therapy with beta-blockers may aggravate symptoms of myasthenia gravis. Additional Effects of Carbonic Anhydrase Inhibition - Therapy with oral carbonic anhydrase inhibitors has been associated with urolithiasis as a result of acid-base disturbances, especially in patients with a prior history of renal calculi. Although no acid-base disturbances have been observed with dorzolamide/timolol. Because DORZOLAMOL contains a topical carbonic anhydrase inhibitor be at increased
